

Saumya Mirajkar

Computer Engineering & IoT Student

Pune, Maharashtra •
saumyamir25@gmail.com • +91 98928 14242

SUMMARY

Computer Engineering and IoT diploma student with hands-on experience in web development, Python, C/C++, JavaScript, Arduino, and embedded systems. Completed a web development internship involving web/mobile application development, project planning and execution, technical research, and collaboration with development and design teams. Built academic projects involving sensor integration, automated control systems, and Python-based CRUD operations.

SKILLS

Languages: C, C++, Python, JavaScript

Web: HTML, CSS

IoT & Embedded: Arduino, Sensor Integration

Tools & Platforms: Git, GitHub, Microsoft Excel, Microsoft PowerPoint

Professional: Communication, Problem-Solving, Teamwork & Coordination, Time Management

PROJECTS

Automatic Car Wiper System **IoT & Embedded**

Problem → Approach → Result: Manual wipers demand constant attention the moment rain starts. | Detected rain with moisture and rain sensors wired to an Arduino, then automated the wiper activation logic. | The wiper engages on its own the instant rain is sensed, so the driver never scrambles for the stalk.

Tech: Arduino, C, C++, Sensor Integration

Library Management System **Software**

Problem → Approach → Result: Paper-based records made books, members, and issue/return tracking unreliable. | Designed a clean data model and a Python CRUD flow for books, members, and transactions. | Records stay accurate and searchable, with a clear audit trail for every issue and return.

Tech: Python, CRUD, Data Handling

EXPERIENCE

Web Development Intern — Big Bang Tech Solutions Pvt. Ltd.

Pune, Maharashtra • May 2026 – Sep 2026

- Assisted with web and mobile application development activities.
- Supported project planning and execution while meeting project deadlines.
- Conducted technical research and supported implementation of technical solutions.
- Collaborated with development and design teams on project activities.

Technologies: Web Development, JavaScript, Python, Git

Independent Builds — Academic Projects

Pune, Maharashtra • 2024 – 2026

- Built an Arduino-based automatic car wiper system with rain/moisture sensors.
- Developed a Python Library Management System with full CRUD operations.
- Integrated sensors and automated control logic in embedded systems projects.

Technologies: Arduino, C, C++, Python, Sensor Integration

EDUCATION

Diploma in Computer Engineering & IoT — Cusrow Wadia Institute of Technology

Pune, Maharashtra • 2023 – Present

C

- Sem 1: 70.82%
- Sem 2: 71.65%
- Sem 3: 65.89%
- Sem 4: 64.98%

SSC (10th Grade) — S S Ajmera High School

Pimpri Chinchwad • 2023

- SSC: 79.80%

CERTIFICATIONS

Google AI Professional Certificate — Google (Jul 2026)

Introduction to Cloud Computing — IBM (Aug 2026)

Python Essentials 1 — Cisco Networking Academy (Jul 2026)

AI Fundamentals — Google (Jul 2026)

AI for Brainstorming and Planning — Google (Jul 2026)

AI for Research and Insights — Google (Jul 2026)

AI for Writing and Communicating — Google (Jul 2026)

AI for Content Creation — Google (Jul 2026)

AI for Data Analysis — Google (Jul 2026)

AI for App Building — Google (Jul 2026)

Open to software, web, Python and IoT internships. github.com/saumyamirajkar
